CLAIMS

- 1. A method for measuring molecular movement in a cell, comprising contacting a cell with a compartment marker and with a molecular marker, imaging the marked cell with a detector, creating a compartment mask, and correlate said compartment mask and said molecular marker to measure molecular movement in a cell.
- 2. The method of claim 1 wherein there is relative motion between the cell and the detector.
- 3. The method of claim 1 wherein the molecular marker is a fluorescent labeled antibody.
- 4. The method of claim 1 wherein the compartment marker is a fluorescent molecule.
- 5. The method of claim 1 wherein the compartment is nucleus, cytoplasm, or membrane.
 - 6. The method of claim 1 wherein the molecule marked is NF-kB.
- 7. The method of claim \1 further comprising the step of inducing molecular movement in the cell.
- 8. The method of claim 7 wherein the induced molecular movement is nuclear translocation.
- 9. The method of claim 7 wherein the molecular movement is induced with LPS or IL-1 β / TNF- α .

- 10. A method for measuring nuclear translocation in a cell, comprising contacting a cell with a nuclear marker and with a molecular marker, imaging the marked cell with a detector, creating a nuclear mask, and correlate said nuclear mask and said molecular marker to measure molecular movement in a cell.
- 11. The method of claim 10 wherein there is relative motion between the cell and the detector.
- 12. The method of claim 10 further comprising the step of inducing molecular movement in the cell.
- 13. The method of claim 12 wherein the induced molecular movement is nuclear translocation.
- 14. The method of claim 12 wherein the molecular movement is induced with LPS or IL-1 β / TNF- α .
 - 15. The method of claim 10 wherein the nuclear marker is 7-AAD.
 - 16. The method of claim 10 wherein the molecule marked is NF-κB.
- 17. The method according to any one of claims 1-16 wherein the images are collected simultaneously.
- 18. The method according to any one of claims 1-16 wherein the detector is a time delay integration charge-coupled detector.
